

Floccin A : A unique flocculating agent developed to replace conventional wastewater chemistries. Get better results with less \$\$ all the time, every time.

CORRUGATORS

- **SAVE 30% ON YOUR TREATMENT EXPENSE**
- **EASE OF USE (Replaces pH adjustment, coagulation, flocculation & distomatious earth)**
- **NEWEST TECHNOLOGY (less pH sensitive).**
- **LABOR SAVINGS**
- **LESS SLUDGE PRODUCTION**
- **NON-LEACHING SLUDGE**
- **ZERO DISCHARGE OPPORTUNITY**
- **FASTER SETTLING SLUDGE**

Corrugator #1

PAST: A corugator with an annual wastewater treatment cost of \$42,000 plus \$20,000 per month required to haul off of untreatable wastewater was very happy to change to this new technology.

PRESENT: Annual wastewater costs dropped to \$24,000 with no haul off expense, they went from using 5 chemicals down to one easy to use product.

Corrugator #2

PAST: Another corrugating facility was treating their wastewater with a competitors product at a cost of \$22,000 per years.

PRESENT: After switching to "Floccin J," the cost per year decreased to \$12,000. In addition, the operator reported clearer water, drier de-watered cake, and more reliable and consistent treatment.

Corrugator #3

PAST: This facility was treating their wastewater at a cost of \$48,000 per year plus \$15,000 in non-compliance fines from the local city wastewater treatment plant.

PRESENT: Their current treatment costs are \$22,000 per year and have yet to receive any fines. They also benefited by not having to use acid, caustic, and diatomatious earth.

Availability

- 50 lb. bags or 2000 lb. super sacks
- Feeders available
- Many blends. Floccin A, B, C, D....
- Call for free samples
