

FloccinAgent™

The Floccin line is a series of many products custom designed to remove most contaminants from wastewater such as:

- ❖ BOD
- ❖ TSS
- ❖ Inks, Pigments and Dyes
- ❖ Emulsified Fats, Oil and Grease
- ❖ Phosphates
- ❖ Helps reduce TDS and EC's vs. other chemistries

The FloccinAgents™ encapsulate the contaminants in strong Floc, producing a waste sludge that easily dewater; the treated water can often be reused or discharged directly to sewer.

Each blend provides a multitude of reactions that simultaneously coagulate, break emulsified oils in water, change the pH, encapsulate the metals, and flocculate to separate the solids from the waste stream.

LIST OF INDUSTRIES:

- Adhesives/Starch
- Aerospace
- Alloy Metal Processing
- Aluminum drawing/rolling
- Anodizing
- Antifreeze
- Automotive
- Battery
- Circuit Board
- Clothing
- Construction
- Corrugated Box
- Cosmetics
- Dairys
- Dyes
- Environmental Remediation
- Filtering Aid
- Fish Processing
- Foam/Surfactants
- Food-Precook facilities
- Food Processing
- Hazardous Waste Reduction
- Herbicide
- Industrial Laundries
- Inks
- Ink/Dye Penetrants
- Jewelry
- Latex Paint
- Lens Grinding
- Machining
- Machine Coolants
- Marine Stripping/Painting
- Meat Processing (Chicken, Pork, Beef)
- Metals-Castings—Cutting, Deburring, Extrusions, Grinding, Sintered, Stamping, Surface Etching
- Natural Gas Fractionating
- Oil Field Drilling
- Oil Refining
- Oily Waste
- Paint & Spray Booth
- Paint Detacification
- Packaging
- Paint Stripping
- Pesticides
- Plastics
- Plating
- Polishing/Grinding
- Precious Metals
- Pressure Washing
- Printing
- Scrap Metal
- Scrubber Water
- Slaughterhouse
- Solvents
- Storm Water Compliance
- Truck Wash
- Vegetable Processing
- Wheel Manufacturing
- Wire Extruding
