

Bus Washing Facility Waste Water Treatment

Astounding Results of Bus Washing Jar Test

The sample from the Transit Bus wash facility was received at a pH of 6.5 and did not require any pH adjustment. 1,000 ml of the sample was tested and dosed with 1.5 grams of Floccin 1105 and provided the results as shown below. This dosage equates to 12 lbs. of Floccin 1105 to 1000 gallons of wastewater. Reaction time was 2 minutes.
