

Mexican Food Manufacturer

A large manufacturer of frozen Mexican food entrees in California was paying extremely high surcharges on their wastewater discharge due to the COD, TSS and FOG levels.

Laboratory testing with Floccin 1105 showed that the results could drastically reduced. The following shows the reduction accomplished in using the Floccin 1105.

Analytical Results

	Untreated	Treated
BOD (ppm)	500	1.7
COD (ppm)	3,600	560
TSS (ppm)	3,600	82
Total Oil & Grease (ppm)	6,700	1,100
