

# Polyethylene Tanks

## Benefits of Polyethylene vs. other Materials:

- Broad range of corrosion resistance from acids to caustics
- Incredible impact resistance/tanks can be dropped without any damage
- Tanks are easily picked up and relocated
- Excellent sunlight resistance and weatherability
- Resins used are potable water and food grade approved
- Can withstand slight pressure and vacuum conditions which might collapse fiberglass or steel tanks

## Capabilities:

- Full range of sizes from 30 gallons to 16,000 gallons. Vertical closed top, open top, cone bottom, flat & slope bottom hiflo, horizontal, spherical and taper designs
- Seismic and wind restraint package available

## Examples of pricing : (call or e-mail for a quote)
